### KEY FINDINGS

The revenue generated by the Asia-Pacific smart water management market is forecasted to increase from \$ 1876 million to \$12334 million between the estimated period of 2017-2026, due to an anticipated CAGR growth of 21.25%.

### MARKET INSIGHTS

China and India are the predominant markets for smart water meters in the Asia-Pacific region. A smart city investment hub was launched in China in the year 2016 according to China's 12th and 13th five-year plan. This initiative indirectly augmented the demand for smart water monitoring, as smart city projects require enhanced and efficient water infrastructure. Similarly, for a country like India where agriculture forms the backbone of the economy, an increasing need for smart water managing is required for irrigation. The Indian market is in fact projected to experience the highest CAGR growth for the Asia-Pacific region over the forecast period of 2017-2026.

### COMPETITIVE INSIGHTS

Takadu Ltd, Schneider Electric Se, IBM, General Electric Company (Ge Water Corporation), ABB Ltd, Honeywell International, Inc. (Holding Company Of Elster Group Se), Utility Systems, Huawei Technologies, Siemens Ag, Itron Inc, Xylem Inc and Belkin Corporation are presently the market leaders for smart water management.
