## Abstracts

### KEY FINDINGS

The revenue generated by the Asia-Pacific Waste to Energy Market is expected to increase from \$10153.9 million to \$15758.6 million over the forecast period of 2017-2026. This growth can be attributed to the possible CAGR increase of 4.53% in the market.

### MARKET INSIGHTS

The Asia-Pacific region is blessed with the presence of several high-profile market players that are involved in the waste to energy market. China, Japan, India, and Indonesia are some of the chief contributors to this region. The Indian market is likely to exhibit the fastest CAGR over the forecast period due to government initiatives like "Swachh Bharat Mission." However, the Asia-Pacific waste to energy market is presently being ruled by Japan. The country is a global leader in developing new technologies and innovations. The Japan International Co-operation Agency and the Department of Environment and Natural Resources (DENR) announced a three-year technical co-operation project in November 2017. This project will aid the local government units to convert solid municipal waste into energy.

### COMPETITIVE INSIGHTS

Waste Management Inc, Hitachi Zosen, Mitsubishi Heavy Industries, Keppel Seghers, Xcel Energy, China Everbright International, Plasco Conversion Technologies (Acquired By Rmb Advisory Services), Green Conversion Systems, Amec Foster Wheeler (Acquire By Wood Group), Suez Environment, Covanta Technologies, C&G

Environmental Protection Holdings Ltd, Wheelabrator, Babcock & Wilcox Enterprises and Veolia Environment are some of the well-known players in this market.
