KEY FINDINGS

The Europe Biochar Market is predicted to increase its revenue from \$193 million to \$875 million between the forecast years of 2017 to 2025, growing at an estimated CAGR of 17.70%. The key driver contributing to the market growth is the application of biochar for carbon sequestration which results in the reduction of greenhouse gases.

MARKET INSIGHTS

The global biochar market segments are categorized according to the application, feedstock, and technology. The most substantial application of the market can be observed in the agricultural sector. From the feedstock segment, the forestry waste is gaining immense popularity. Also, the slow pyrolysis technology is gaining wide acceptance in the biochar market. Although the market is showing considerable progress, a lack of demonstration projects, possible contamination of biochar and its feedstock, and the associated high costs are some of the major concerns faced the market.

COMPETITIVE INSIGHTS

Vega Biofuels Inc, Avello Bioenergy, Cool Planet Energy System, Biogreen-Energy, Biochar Now, Agri-Tech Producers LLC, Tolero Energy, and Pacific Biochar are few of the renowned companies studied for this market.
