KEY FINDINGS

Many people in Europe rely on cheese for their dietary requirement of protein and calcium. Cheese is also an integral part of several European dishes. Every year, approximately 10 million tons of cheese is consumed in the European Union. As a result, the Europe cheese market is expected to witness an estimated CAGR of 2.89% over the forecast period of 2018-2026.

MARKET INSIGHTS

Cheese has been traditionally consumed after a meal or as an all-day snack in European countries like France and Italy. In fact, the France cheese market presently accounts for the biggest revenue share in Europe. Other key cheese markets analyzed in this report are UK, Germany, Spain, Netherlands, Switzerland and Russia. Cheese is one of the fastest-growing dairy products in the UK because of its higher demand as a food ingredient in pizza, pasta, and sandwiches. In Germany, a growing demand for natural cheese and new launches has been observed in recent years. However, growing awareness about negative effects of processed cheese and intense competition in the market is challenging the market growth.

COMPETITIVE INSIGHTS

Leading cheese producing companies in this region are Britannia Industries Ltd, Kraft Heinz, Saputo Inc, Fromageries Bel, Associated Milk Producers Inc, Dmk Deutsches Milchkontor, Fonterra Food, Arla Foods, Mother Dairy, Bel Group, Emmi Ag, Savencia SA, Lactalis Group and Almarai.
