## Abstracts

### KEY FINDINGS

The Europe CRISPR market is anticipated to evolve with 35.19% CAGR over the forecast period of 2018-2026. The revenue generated by this market is expected to increase from \$120 million and reach \$1817 million over this forecasted period.

### MARKET INSIGHTS

U.K market dominated the Europe CRISPR market in 2017 and is expected to continue its dominance throughout the forecast period. Growing stem cell research in the region is significantly aiding the market growth. Germany implies strict liability for contamination with GMOs, and has tough, strict and methodically enforced regulations over the release of GMOs into the market. On the other hand, the law on Biomedical Research in Spain allows research on embryos, but for therapeutic purposes only. In France, some laws like the Law on Bioethics 2004 and 2011 restricts the use of human embryos and embryonic stem cells for research until proper regulatory conditions are met.

### COMPETITIVE INSIGHTS

Companies like Novartis International Ag, New England Biolabs Inc, Lonza Group Ag, Venture Capital Funding, Precision Biosciences, Sigma-Aldrich (Merck), Thermo Fisher Scientific, Sangamo Biosciences Inc, Integrated DNA Technologies (IDT), Collectis Bioresearch Sas, Horizon Discovery Plc, and Editas Medicine have strongly established themselves in this market.
