KEY FINDINGS

The European food encapsulation market is anticipated to grow at CAGR of 6.63 % over the forecast period 2017-2025 and is expected to be worth \$18653 million by 2025. The advancement in preservation techniques coupled with Nano-encapsulation methods is mainly responsible for such phenomenal growth of the market.

MARKET INSIGHTS

The various applications of food encapsulation such as retention or masking of taste and color, increased shelf life, a rise in demand for functional or nourishment foods, enriched bioavailability of food ingredients, controlled release function, and increasing demand for nutritional health foods for adults as well as for children are the major drivers for the food encapsulation market. However, the market is facing a tough challenge because of the huge expenses incurred in order to use the technology and a slow progress in the technological methodologies. In spite of that, application of nanotechnology in the food encapsulation industry and multi-component ingredient delivery system have opened unparalleled opportunities for the potential growth of the market.

COMPETITIVE INSIGHT

Balchem Corporation, Aveka Group, Firmenich Sa, Friesland Brands B.V, Givaudan Saadr, Ingredion Incorporated, Royal Dsm N.V., Kerry Group Plc, Lycored Ltd, Sensient Technologies Corp, Symrise Ag, Cargill Incorporated are some of the top players in the European Food Encapsulation market. Some of the companies, especially Firmenich

and Symrise Ag, also manufacture products like savory goods, fragrances, cosmetic raw materials, functional nutrient, flavorings etc and have now ventured into other related sectors like beauty, consumer goods, and healthcare industries.
