KEY FINDINGS

The geographic information system GIS Europe market is anticipated to expand considerably over the forecast period of 2018-2026. The estimated CAGR during this forecasted period is 9.83%. Increasing demand for spatial data in varied industries and growing need for efficient 3D GIS and management of land are the two factors propelling the growth of the geographic information system market in Europe.

MARKET INSIGHTS

The countries analyzed in the Europe region are UK, Germany, and France. Easy access to open source GIS software, technological limitations and turnaround time are the challenges faced by the geographic information system market in this region. However, application of GIS in disaster management, its inclusion in business intelligence and fusion of GIS in video games are the trending opportunities for the GIS market in the European region. But, strict rules and regulation and enormous expense concerning GIS are restricting the market progress.
