KEY FINDINGS

The Europe Geospatial Imagery Analytics market which was calculated to be worth \$869 million in 2016 is predicted to evolve further over the forecast period of 2017-2026. By the end of 2026, the market is expected to generate the highest revenue share of \$12412 million, owing to a CAGR of 30.58%.

MARKET INSIGHTS

The United Kingdom and Germany are the two prominent markets in this region. The former contributed to the most significant revenue share of the market in 2016 while the latter is expected to exhibit the highest CAGR throughout the estimated period. The introduction of TanDEM-X High-Resolution Elevation Data Exchange (TREx) Program in 2015 gave a considerable boost to the German market. However, the large-scale deployment of geospatial imagery analytics in construction and transportation & logistics applications in the United Kingdom is majorly responsible for the market's phenomenal growth.

COMPETITIVE INSIGHTS

Geocento, Harris Corporation, Urthecast Corporation, General Electrical Company, Autodesk Inc, Oracle Corporation, Eos Data Analytics Inc, Esri Inc, Hexagon Ab, Satellite Imaging Corporation, Keyw Corporation, Trimble Navigation Ltd, Pitney Bowes Inc, Google Inc, and MDA Geospatial Services are few of the leading players in the geospatial imagery analytics market.
