MARKET INSIGHTS

Europe in vitro fertilization market extends its applications in hospitals & research laboratories, cryobanks, and fertility & surgical centers. The regional market is experiencing a significant rise due to factors like declining fertility rate, rising government support for the adoption of in vitro fertilization techniques and increasing success rates of its IVF treatments. The market segments for the Europe in-vitro fertilization market are classified on the basis of procedures, products, and end-users. The rest of Europe market captured the biggest revenue share in the year 2016. However, it is the German market that is slated to exhibit the highest CAGR growth for this region. The success rate of IVF is at 40% for this market.
