KEY FINDINGS

In the year 2017, the Europe laser technologies - defence, industrial, and medical market was estimated to be worth \$945 million. Over the forecast years of 2018-2026, the market is anticipated to rise at 9.61% CAGR and generate a market revenue of \$2184 million.

MARKET INSIGHTS

Rising defence budget has been a major propelling factor for the Europe laser technologies market. Russia, Germany, France, U.K and rest of Europe are the dominating countries in this region. Although Russia predominates this market, France is anticipated to evolve with the highest CAGR over the forecast period. U.S. and France work together on a broad range of trade, security and geopolitical issues. Under former President Sarkozy's leadership in 2009, France decided to rejoin NATO's military command structure, and once again became a fully integrated member of the Alliance. Factors like this are further securing its position at the global scene. Germany is also emerging as a significant defence player in Europe. However, restrictions on demonstration of laser systems in certain parts of Europe is restraining the market to some extent.

COMPETITIVE INSIGHTS

Dilas Diodenlaser Gmbh, Alltech Gmbh, Rafael Advanced Defense Systems Ltd, Bae Systems Plc, Northrop Grumman Corporation, Boeing Company, Newport Corp, Spi

Lasers Plc, Coherent Inc and others are some of the prominent players in this market
