KEY FINDINGS

The Europe MRI systems market is expected to reach \$xx million by the end of the forecast period of 2018-2026, exhibiting a CAGR of 3.87%. This growth can be attributed to the rise in chronic diseases, high incidences of accidents and injuries and the growing elderly population. Markets of countries like UK, Germany, Russia, France and the rest of Europe are covered in this report.

MARKET INSIGHTS

The market segmentation is done on the basis of the type of technology (MR angiogram, MR venogram, functional MRI, NMR spectroscopy, etc.), on the basis of application (for whole-body, brain & neurological disorders, cardiac, other); on the basis of architecture (open/ close MRI systems); and on the basis of the basis of field strength (low, mid, high, very high and ultra-high field MRI system). Although the increasing healthcare expenditure and the growing demand for minimally-invasive procedures are propelling the market growth, the market might face some restraints due to factors such as regulatory issues, lack of skilled professionals and the reduced reimbursement rates.

COMPETITIVE INSIGHTS

Companies such as Fonar Corporation, Bruker Corporation, GE Healthcare, Toshiba Healthcare Systems, Siemens Healthcare, Mindray Medical International Ltd and Medtronic have a presence in this market.
