KEY FINDINGS

Globally, calcium chloride is widely used as a dust control and de-icing agent and has experienced a growing demand from FMCG sector in recent years. The global market for calcium chloride stands to witness a CAGR rise of 6.36% for the forecast years of 2017-2025.

MARKET INSIGHTS

The significant market segment for calcium chloride is the application segment which is further sub-divided into construction, dust control & de-icing, pharmaceuticals and other applications. Growing demand for calcium chloride in waste treatment and in several agro-industries is significantly boosting the market demand. However, stringent regulations in using them and possible adverse effect of using calcium chloride on to the environment might prove challenging for the market growth.

REGIONAL INSIGHTS

North America, Asia-Pacific, Europe and rest of the world are the regions included in the geographical segmentation of the global calcium chloride market. The Asia-Pacific market is expected to exhibit a considerable growth due to several emerging companies engaging in this market. On the other hand, the North American market is predicted to contribute most significantly during the forecast period on account of several application of calcium chloride for de-icing roads and runways and in the food processing sector in this region.
