KEY FINDINGS

A global rise in infertility and increasing awareness about its effective treatments, combined with the emergence of medical tourism in fertility treatments are propelling the global infertility testing and treatment market. By the end of the forecast period of 2018 – 2026, the market is predicted to evolve at 6.39% CAGR.

MARKET INSIGHTS

The global infertility testing and treatment market is segmented on the basis of male infertility, female infertility and end-users. Both the male and female infertility markets are further sub-segmented into testing and treatment. Increasing number of couples are opting for IVF techniques, and as a result, the female infertility treatment segment is dominating the market. The end-users for this market are sub-segmented into hospitals and research laboratories, fertility and surgical centers, and cryobanks.
