KEY FINDINGS

The global ophthalmic drugs and device market is expected to grow at a CAGR of 5.97% over the forecast period of 2018-2026. The rising eye-related disorders in the world, changing lifestyle, and rising healthcare expenditure are the major driving factors in the growth of the global ophthalmic drug and devices market.

MARKET INSIGHTS

The global ophthalmic drugs and devices market is segmented on the basis of the type of devices and type of drugs. The devices are sub-segmented into diagnostic and monitoring equipments, surgery devices, and vision care devices. The drugs segment of the market includes glaucoma drugs, retinal disorder drug, dry eye drug, inflammation, allergic conjunctivitis, and conjunctivitis drugs and drugs by use of preservation. Well-known drugs are going off patent, and key players affected by the delay in new drugs coming into the market are the two factors restricting the growth of the market. The market faces challenges in risk associated with the ocular diseases and lack of awareness among people regarding ophthalmology.

REGIONAL INSIGHTS

Geographically, the global ophthalmic drugs & devices market is segmented into North America, Europe, Asia-Pacific, and Rest of World. Currently, North America holds a massive market share followed by Europe and Asia-Pacific. Due to rising geriatric population, increase in strategic initiatives by large market players present in the region and increasing prevalence of ocular diseases, the North America ophthalmic drugs &

devices market holds high growth prospects for the near future. However, over the forecasted period, the Asia-Pacific market is expected to grow with the highest CAGR. APAC market is majorly driven by the rising prevalence and increasing facilities for eye treatment in hospitals.
