KEY FINDINGS

The North America automotive lead-acid battery market is expected to rise with a CAGR of 3.54% over the forecast period of 2017-2025. Over the said period, the revenue generated by the market is also expected to increase from \$6167 million in 2016 and reach \$8425 million by 2025.

MARKET INSIGHTS

The United States is presently commanding the North America automotive lead-acid battery market and is expected to continue its reign throughout the forecast period. The increasing year-over-year automobile sales and the significant adoption of electric vehicles (EV) in the country are primarily driving the U.S market. For the region of Canada, the expanding automobile production, coupled with the increasing electric vehicle sales is expected to drive the automotive lead-acid battery market growth. However, concerns regarding the high levels of lead and sulfuric acid in these batteries, coupled with the stringent government regulations in the region might restrain the North American market growth in the near future.

COMPETITIVE INSIGHTS

B.B. Battery Co, Toshiba Corporation, CSB Battery Company Ltd, Zibo Torch Energy Co Ltd, Exide Technologies Inc, C&D Technologies Inc (Acquired By Kps Capital Partner), Narada Power Source Co Ltd, East Penn Manufacturing, and Crown Battery are some of the players dealing in this market.
