MARKET INSIGHTS

The markets of Canada and the United States are majorly analyzed for this region. The government sector is the most important end-user for this market as it utilizes geospatial imagery analytics to determine precise topographic mapping for the enhanced and efficient planning of its infrastructure. The geospatial imagery analytics are also employed for identifying the exact location of natural resources beneath the earth's crust and can be used to prevent the theft of electricity through its electricity theft analytics application. The U.S market is leading the North American region on account of several initiatives put forth by multiple satellite companies in the region. The U.S military and intelligence department is deploying the technology for monitoring troop movement and other strategic military activities that are crucial for U.S. safety and security.
