KEY FINDINGS

A leading region in the global surgical/operating microscope market is North America. The region contributed the highest revenue in 2017. Also, by the end of the forecast period of 2018-2026, the North America surgical/operating microscope market is likely to flourish at a 9.66% CAGR.

MARKET INSIGHTS

Factors such as increased adoption of fluorescent image-guided surgery (FIGS), increasing number of cosmetic surgeries and customized solutions for microscopy are contributing to this market's growth. US and Canada are the key regions analyzed for this market, with the US contributing the highest revenue in 2017. However, heavy customs duties on medical devices and excise taxes imposed by the US government are restraining the North America surgical/operating microscope market's growth.
