Abstracts

Gas infrastructure allows for raw natural gas produced at the wellhead to be transformed into the pure, safe substance used by consumers and business throughout the world. According to the World Energy Council (WEC), global demand for natural gas is likely to increase by 44% between 2007 and 2035 as a combination of an increasing global population, economic growth, significant natural gas reserves and a move away from more polluting energy sources to produce cleaner gas power, will help to drive growth in the natural gas development and processing industry. Consumption growth in between 2015 and 2020 will be largely driven by demand in the industrial and electric power sectors. This will create substantial opportunities for companies involved in the gas processing infrastructure market, as new facilities will need to be constructed and existing facilities upgraded to process increasing quantities of gas.

In 2015, the key demand drivers would be industrial and power plants. Residential and commercial demand will drop in 2015 and 2016. Cheaper natural gas, compared to coal, is the primary demand driver from power generators. However, the strong dollar and oversupply factors will put downward pressure on natural gas in the short term, but, cold weather estimates and strong demand could push natural gas beyond the important resistance of US\$2.75 per MMBtu.

This report offers an examination of this important market to 2020, providing detailed market forecasts for each of the regional markets and offering in-depth analysis of the opportunities and challenges facing companies in the gas processing infrastructure market throughout the world. The various drivers and restraints of the market are evaluated in order to provide readers with specific insights into the future direction of the industry and where the greatest opportunities are likely to be found.

Why you should buy The African Natural Gas Infrastructure Market 2015

145 pages of comprehensive analysis

115 tables, charts, and graphs quantifying the market in detail

African natural gas infrastructure market forecasts between 2015 and 2020

Five year market forecasts of the Global Gas Processing Infrastructure Market:

Forecasts for the 8 leading countries and Rest of Africa (RoA) markets within the African gas infrastructure market:

Nigeria

Algeria

Egypt

Ghana

Angola

Mozambique

Tanzania

South Africa

Rest of Africa

A SWOT analysis that examines the African Natural gas infrastructure market

21 key companies identified and profiled operating within the African gas market.

You can order this report today and discover the latest market trends and uncover sources of future market growth for the African gas infrastructure industry and gain an understanding of how to tap into the potential of this market by ordering *The African Natural Gas Infrastructure Market 2015*.

COMPANIES MENTIONED

African Barrick Gold
Agip
Anadarko Petroleum Corporation
BG Group
BP
Compañía Española de Petróleos, S.A.U. (Cepsa)
Chevron
CNC
China National Offshore Oil Corporation (CNOOC)
ConocoPhillips
Continental Resources
Cyprus Hydrocarbons Company (CHC)
Edison International
Egyptian Gas Holding Company (EGAS)
Empresa Nacional de Hidrocarbonetos (ENH)
Eni S.p.A.
ExxonMobil
Foster Wheeler
JGC Algeria
JGC Corporation
Galp Energia SGPS, SA
Gazprom
GDF Suez
Ghana National Gas Company (GNGC)
Ghana National Petroleum Corporation (GNPC)
GS Engineering & Construction
Golar LNG
MITSUI & CO., LTD
Nigeria National Petroleum Corporation (NNPC)
Oando Plc

Occidental Petroleum
Ophir Energy
Hess Corporation
Partex Oil and Gas Corporation
Petrobras
PetroSA
Petroceltic International
Petronet LNG
PFC Energy
Quantum Pacific
Rasgas LNG
Repsol S.A
Royal Dutch Shell
RWE
Sasol
SacOil Holdings
Sonatrach
Sonelgaz
Sonangol
Statoil
Technip
Total
Tokyo Electric Power Company
Union Fenosa Gas
Organisations
Algerian National Oil and Gas Development Agency
International Monetary Fund (IMF)
National Oceanic and Atmospheric Administration (NOAA), Nigeria
Petroleum Institute
United States Geological Survey (USGS)
