Abstracts

East Africa is fast becoming one of the world's most interesting oil and gas hotspots. For many years the area was neglected by the world's oil and gas industry, and even in Africa it was overshadowed by the rapid development in West Africa and the established markets in North Africa. However, with the discovery of both oil & gas reserves in the region over the past five years, opportunities are being created within a number of East African nations. The reserve estimates in the region have increased rapidly over the past few years and yet only a small percentage of the region has been properly explored.

This report covers emerging developments in the oil and gas sectors in ten East African countries: Mozambique, Tanzania, Uganda, Kenya, Ethiopia, Sudan & South Sudan, Madagascar, Democratic Republic of Congo (DRC), Somalia and Rwanda and the region's largest oil and gas producers are Sudan and South Sudan.
