Abstracts

Today the tourism and hospitality industry in India contributes around 6.23 per cent to the national GDP and 8.78 per cent of the total employment in the country. The constant transformation has made the Indian hotel industry more functional and practical and has gained a level of acceptance world over. The standards of facilities and services offered have evolved over the last decade towards the extensive use of technology, environment friendly services, pricing, market segmentation, regional preferences, etc. The Indian hotel industry has seen a significant growth in room inventory across categories from upscale luxury to limited services and boutique & budget hotels. The occupancy and the room rates have seen continued gains both from the domestic and the international traveler in both the business and leisure segment. With the continued growth in India's GDP, improvement in the per capita income and increased aspirational spending, the Indian hospitality sector is expected to grow faster than most countries around the world.
