Price (Global Site License): \$5,990.00

2008 has not seen any letdown in the use of wireless technologies in healthcare settings. The clinical environment is a highly mobile one, and physicians, nurses and other clinical operators have a real need for fast information they can act upon. Wireless technologies fit healthcare well.

It's therefore no surprise that hospitals are dedicating large portions of current and future budgets to IT development and wireless is likely to be among their choices.

Kalorama's *Wireless in Healthcare 2008* is your guide to the still growing market for wireless healthcare applications in the United States and globally. This report contains explanations that cut through the confusion surrounding these technologies and provide readers with a total picture of wireless in healthcare.

Since the previous edition, some technologies have performed better than others and 2007 results have led to reforecasting of some technologies. The competitive arena has not dramatically changed since last year, with a few key players dominating and opportunity for smaller companies, but developments have been interesting.

The report provides:

Current Revenues and Forecasts to 2012 for all wireless areas of technology in healthcare settings.

137 Tables and Figures provide accessible information about the wireless in healthcare marketplace.

Explanation of the Major Technologies, (Zigbee, Bluetooth, RFID, UWB, WMAN and WLAN)that will be used in healthcare.

Five Conclusions about wireless in healthcare from the research that market watchers will want to know.

Easy access to the **Objective Opinions of Executives** who have achieved results in this still-growing market.

Eight Case Studies of wireless technologies in action in telemedicine, e-prescribing, patient monitoring, group practices and other healthcare environments.

Detailed Profiles of 9 Key Companies in this market, major products and key executives.

The report provides today's market figures and realistic projections for future revenues based on consideration of data and extensive interviews with industry experts. Looking at several detailed case studies, the report shows how wireless is already being used by major healthcare companies across a wide variety of applications, including:

Hospitals

Homecare and Telemedicine

Pharmaceutical Research (Clinical Drug Trials)

Inventory Control

Pharmaceutical Sales Force Management

Inventory Control

Physician Offices**Nursing Homes****Medical and Diagnostic Laboratories****Patient Monitoring**

The report details the companies in this field - and why there is still an opportunity for new competitors. It discusses the currently implemented technologies and the technologies to watch that in four years, will gain impressive market share. Finally, it describes the trends that will push market expansion and reduction of cost of these devices. The healthcare applications and marketplace for the following technologies are discussed in detail:

Bluetooth,**Zigbee,****RFID****UWB****Wireless Local Area Networks (WLAN)****Wireless Metropolitan Area Networks (WMAN)****Wireless Wide Area Networks (WWAN)**

As a global report, *Wireless Opportunities in Healthcare* will look at the wide-open opportunities available in the European Union and at Asian markets, but in market analysis we note the role of the United States as the leader in this field and the market to watch.

Kalorama's unique and thorough research process provides an exhaustive analysis of this evolving market. Information was gathered using both primary and secondary research including comprehensive research of secondary sources such as company literature, databases, investment reports, and medical and business journals. For the purpose of this study, Kalorama Information conducted telephone and email interviews with key industry officials, consultants, health care providers, and government personnel. These sources were the primary basis in gathering information specifically relating to revenue and market share data presented in this report. Specific interviews with wireless technology company representatives included marketing directors, division managers, and product development representatives.

In addition to superior coverage of the overall wireless healthcare market, ind-depth company profiles are included for the following wireless technology companies:

Achieve Healthcare

Cisco

Extreme Networks

Nortel Networks

Motorola/Symbol

Cerner

Quadra Med

Sybase

Cardinal Health

Datascope

Phillips Data Systems

Siemens

Contents

CHAPTER ONE: EXECUTIVE SUMMARY

Healthcare Industry

Wireless Industry

Wireless in Healthcare

Definition and Scope of Study

Application of Wireless Technologies in Healthcare

Key Wireless Technologies

Market Overview

Market for Wireless Technologies in Healthcare

Competitive Landscape

Network Infrastructure Providers

Software Providers

Medical Device Manufacturers

Regulatory Environment

Conclusions and Future Outlook

First Conclusion

Second Conclusion

Third Conclusion

Fourth Conclusion

Fifth Conclusion

CHAPTER TWO: INTRODUCTION AND OVERVIEW

Healthcare Industry

Worldwide Healthcare Market

Information Technology (IT) Market in Healthcare

Trends

Challenges

Industry Adoption of Wireless Technologies

Hospitals

Number of Hospitals

Technology Adoption in Hospitals

The Most Wireless Hospitals

Physicians

Number of Physicians

Technology Adoption by Physicians

Nursing Homes

Technology Adoption by Nursing Homes

Pharmacies

Technology Adoption by Pharmacies

Medical and Diagnostic Laboratories

Technology Adoption by Laboratories

Life Insurance Carriers

Technology Adoption by Life/Health Insurance Carriers

CHAPTER THREE: OPPORTUNITIES FOR WIRELESS APPLICATIONS IN HEALTHCARE

Introduction

Key Benefits

Healthcare Industry Segmentation for Wireless Applications

Healthcare Service Providers

Applications of Wireless Technologies for Healthcare Service Providers Segment

Pharmaceuticals

Application of Wireless Technologies for the Pharmaceuticals Segment

Health Plan Providers

Applications of Wireless Technologies for Health Plan Providers Segment

Key Application

Remote Patient Monitoring

Market Overview

Clinical Drug Trial

Market Overview

E-Prescription

Market Overview

Patient/Asset Tracking

Market Overview

Pharmaceutical Sales Force

Market Overview

CHAPTER FOUR: KEY WIRELESS TECHNOLOGIES

Data Transmission Session

Wireless Operating Systems, Languages, and Protocol

Wireless Networking Technologies

Wireless Personal Area Network - Bluetooth

Market Overview

Benefits of Bluetooth in Healthcare

Applications of Bluetooth in Healthcare

Issues with Bluetooth Adoption in Healthcare

Wireless Personal Area Network - RFID

Market Overview

Benefits of RFID in Healthcare

Applications of RFID in Healthcare

Issues with RFID Adoption in Healthcare

Wireless Personal Area Network - Zigbee

Market Overview

Benefits of Zigbee in Healthcare

Applications of Zigbee in Healthcare

Issues with Zigbee Adoption in Healthcare

Wireless Personal Area Network - UWB

Market Overview

Benefits of UWB in Healthcare

Applications of UWB in Healthcare

Wireless Local Area Network (WLAN)

Market Overview

Benefits of WLAN in Healthcare

Applications of WLAN in Healthcare

Issues with WLAN Adoption in Healthcare

Wireless Metropolitan Area Network (WMAN)

Market Overview

Benefits of WMAN in Healthcare

Applications of WMAN in Healthcare

Issues with WMAN Adoption in Healthcare

Wireless Wide Area Network (WWAN)

Market Overview

Benefits of WWAN in Healthcare

Applications of WWAN in Healthcare

Issues with WWAN Adoption in Healthcare

CHAPTER FIVE: IMPLEMENTING WIRELESS TECHNOLOGIES IN HEALTHCARE

Wireless Infrastructure for Healthcare

Planning for Wireless Infrastructure Deployment

Initiation and Execution of a Wireless Deployment Project

Cost of Implementation of Infrastructure

Cases of Wireless Implementation Costs

Return-on-Investment Period

CHAPTER SIX: MARKET OVERVIEW OF WIRELESS TECHNOLOGIES IN HEALTHCARE

Market Definition

Market Size

The US Wireless Market in Healthcare

Technology-wise Market Break-out

WPAN - Bluetooth Market in Healthcare

WPAN - RFID Market in Healthcare

WPAN - Zigbee Market in Healthcare

WPAN - UWB Market in Healthcare

WLAN Market in Healthcare

WMAN Market in Healthcare

WWAN Market in Healthcare

Technology Adoption

Drivers and Inhibitors

Growth Drivers

Growth Inhibitors

Emerging Trends

Emerging Applications

Nanobots

Implantable Medical Devices

CHAPTER SEVEN: CASE STUDIES

George Washington University Hospital - WLAN Implementation

Requirement for Implementation of Wireless Technologies

Expected Benefits

Planning and Implementation

Cost of Implementation

Challenges in Implementation

Memorial Medical Center - WLAN Implementation

Requirement for Implementation of Wireless Technologies

Planning and Implementation

Challenges in Implementation

Cardinal Health and RFID Implementation

Implementing RFID

Benefits

Smith & Nephew - Sales Force Automation

Planning and Implementation

Benefits

Achieve Healthcare Technologies - e-Prescription

Requirement for e-Prescription

Benefits

Challenges in Implementation

Bayer Healthcare - e-Drug Trials

Requirement for e-Drug Trials

Benefits

Planning and Implementation

Island Health Care - Tele-homecare

Requirement for Tele-homecare

Benefits

Wireless Technologies for Patient Recovery - Remote Patient Monitoring

Requirement for Remote Monitoring

Telemonitoring Solution

Results

CHAPTER EIGHT: COMPETITIVE ANALYSIS AND KEY COMPANY PROFILES

Competitive Landscape

Segmentation of Players
