Abstracts

The Asia Pacific 3D Machine Vision Market would witness market growth of 18.7% CAGR during the forecast period (2020-2026).

Automobile manufacturers have gradually started relying on machine vision technologies, comprising 3D imaging, multi-camera systems, barcode reading, line scan cameras, and smart cameras to achieve different levels of automation all through the process production. By applying these technologies, the carmaker's money is saved, and also these speeds up the processes of automated products that can create these processes more efficiently and minimizes the time and costs of maintenance accompanied by the wearing and tearing of mechanical components. Furthermore, the development of standardized interfaces improves the interoperability between automation technology and machine vision.

The 3D machine vision technology includes various components to capture images of products and analyze them on the basis of different parameters such as quality and safety. This technology is a combination of hardware and software that offers

operational control to the devices in order to execute functions like capturing and processing of images and then measuring several characteristics that are required for decision making. The main components of the system comprise lighting, lens, image sensors, vision processing, and communication devices. 3D Machine vision systems assist in resolving complicated industrial tasks with reliability.

Industrial machine vision systems are considered a more robust technology that demands high stability, accuracy, and reliability as compared to those systems that are used in institutional or educational applications. The cost of these systems is also less than other systems that are used in military, defense, aerospace, and other government applications. All these factors are likely to result in greater adaptability of such technologies in the industrial sectors. Additionally, the robotic vision systems used increasingly adopted in the industries thereby it is strengthening the overall market.
