Abstracts

The Asia Pacific AI In Asset Management Market would witness market growth of 44% CAGR during the forecast period (2020-2026).
From the past few years, financial institutions are implementing artificial intelligence (AI) technology in order to manage their financial assets and minimizing the operating cost, thus growing the revenue. Numerous banks and fintech companies are swiftly deploying voice chatbots and assistants to manage the interactions with the customer and try to resolve issues (queries) with the least human involvement. Machine learning, speech recognition, and computer vision technologies are currently in demand, and the majority of acquisitions in the past few years were accompanied by these technologies. The same technologies will lead the investment patterns in the forecast period.
The main areas in which AI is deployed in financial assets management embrace personal financial management, fraud detection, and investment banking. The financial institutions can effectively manage their financial assets with the use of financial asset management, and it is also beneficial in meeting the expectations of the changing
