Abstracts

The Asia Pacific Autoimmune Disease Therapeutics Market would witness market growth of 5.72% CAGR during the forecast period (2019–2025).

Autoimmune diseases can be understood as disorders in which the immune system erroneously attacks the patient's body. In the usual scenario, however, the immune system protects against germs such as bacteria and viruses by sending out an army of fighter cells to attack them when it senses these foreign invaders.

Asia-Pacific offers profitable expansion opportunities for main players working on the therapeutic market for autoimmune disease due to the large population base, increased buying power, increased autoimmune disease incidence, and increased demand for advanced autoimmune disease therapeutics. Growth in the number of aging populations and increased early detection of the disease with increased healthcare spending are anticipated to boost growth in this region's market for autoimmune disease therapeutics.
