The Asia Pacific Cognitive Radio Market would witness market growth of 19.1% CAGR during the forecast period (2017 – 2023). Cognitive Radio (CR) is an adaptive, intelligent radio and network technology that has the capabilities to automatically detect available channels in a wireless spectrum and accordingly change transmission parameters, which would enable multiple communications to run concurrently and at the same time improve radio operating behavior. The Asia Pacific region would be the fastest-growing region due to growing awareness about effective spectrum utilization, and business productivity, supplemented by the competently designed cognitive radios. The spectrum sensing application involves observing and updating spectrum status and movement of the licensed or primary users, by periodically sensing the frequency band. Spectrum sensing supports sensing of any spectrum hole or idle spectrum at a particular time, location, or band.

Based on Type, the market report segments the market into Software, Hardware, and Services.
