Abstracts

The Asia Pacific Continuous Glucose Monitoring Systems (CGMS) Market is expected to grow at a CAGR of 32% during 2016 -2022.

The inherent benefits of CGMS are far superior than self-monitoring blood glucose (SMBG) devices i.e., POC glucometers. Also, the data obtained by CGMS and trend analysis is highly accurate and reliable as compared to other SMBG devices/POC glucometers. Such unparalleled superiority would drive the market adoption much higher among the end-users.

Increased and ongoing efforts of 'patient-education' and 'screening for diabetes' programs would increase the awareness levels and eventually would drive the overall diabetes treatment and management market growth. Significantly growing purchasing power among the end-user/patient base in the developing and underdeveloped regions would act as a major factor driving the market during the forecast period.

The report highlights the adoption of Continuous Glucose Monitoring Systems in Asia Pacific. Based on the Component, the Asia Pacific Continuous Glucose Monitoring Systems Market is segmented into Sensors, Transmitters & Receivers and Integrated Insulin pumps segment. Based on the End user, the market is bifurcated into Diagnostic centers/clinics, ICUs and Home Healthcare segments.
