Abstracts

The Asia Pacific Cranial Implants Market would witness market growth of 7.6% CAGR during the forecast period (2019-2025).

Due to the increasing preference of the surgeons for the product, a personalized cranial implants segment is expected to lead the market over the forecast period as each skull injury is complicated and requires specific implants. It is expected that increased prevalence of brain tumors due to genetic disorders as well as unhealthy lifestyle coupled with increased injuries, wounds, and road accidents will drive demand, thus influencing segment growth.

Due to the specialized and customized treatment of patients, neurosurgery centers segment is growing at a rapid pace. Also, better results than hospitals increase the requirement for neurosurgery centers. Furthermore, neurosurgery facilities guarantee that patients obtain personalized treatment with better patient experience. Asia Pacific is anticipated to grow at the highest CAGR owing to growing neurological disorder cases combined with increased public efforts and NGO awareness programs. The existences of large numbers of industry players in economies like China, Japan, and India drives growth predominantly. Increasing cancer cases are, moreover, another important driver.
