Abstracts

The Asia Pacific Disposable Face Masks Market would witness market growth of 6.3% CAGR during the forecast period (2019-2025).

A novel coronavirus appeared in China at the end of 2019. This has spread exponentially across the world since then. This novel coronavirus is called SARS-CoV-2 and the disease it causes is called COVID-19. Although some have mild illnesses with COVID-19, others may experience trouble coughing, pneumonia, and even respiratory failure. Older people and those with chronic health problems are most at risk for serious illness.

Surgical masks are lightweight, loose-fitting facial masks that cover the nose, mouth, and chin. They are usually used to shield the wearer from sprays, splashes, and large-particle droplets; to avoid the transmission of potentially contagious respiratory secretions from the wearer to others. Surgical masks can differ in style, but the mask itself is mostly flat and rectangular with pleats or folds. The top of the mask has a metal strip that can be molded around your nose. Elastic bands or tight, straight ties help keep a surgical mask in place when you're wearing it.

An N95 Respirator is a closer face mask. In addition to splashes, sprays, and large droplets, this respirator can also filter out 95% of very tiny particles. Things involve viruses and bacteria. The respirator itself is usually circular or oval in shape and is designed to create a tight seal on your nose. Elastic bands are helping to keep it tight to the nose. Some forms may have an attachment called an exhalation valve that can help

to breathe and build up heat and humidity.

Based on Product, the market is segmented into Protective Masks, Dust Masks and Non-woven Masks.

Based on Application, the market is segmented into Industrial and Personal. Based on Distribution Channel, the market is segmented into Offline and Online. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
