Abstracts

Packed food is one of the safest ways to keep food fresh. However, packing food with plastic or paper has inherent threats. Edible packaging has come as an alternative to conventional packaging. Edible food packaging is sheet of edible coating, layered with a food ingredient. In simple words, edible packaging is when one can eat the food with its package. The packaging provides various benefits such as it helps in reducing waste, creates product stability, provides safety to the product, and there is no compromise to the product's quality as well. Moreover, it provides convenience to the consumers as well.

Increasing demand for high-quality, safe, convenient food, and products with long shelf life are some of the factors that have been driving the edible packaging in food & beverages and pharmaceuticals industry. Edible packaging takes control on released ingredients, enhances sensory characteristics, and also protects the product from oxygen, moisture, heat, and other exposures. The product provides advantages to both the industries. In the coming years, the demand for edible packaging is expected to increase.
