Abstracts

The Asia Pacific Egg Protein Market would witness market growth of 7.4% CAGR during the forecast period (2020-2026).

Demand is projected to be driven by factors such as urbanization, the Western effect on diets, a broader emphasis on leading active lifestyles and the increasing growth of the middle class, which has raised disposable incomes in emerging economies like China and India. In addition, the rise in the production of poultry in the Indian market increases egg availability. The reports released by the IEC and WEO reveal India as being the fastest-growing world producer of eggs, which will help fuel demand growth. India was also the world-leading manufacturer of eggs.
