The Asia Pacific Electric Vehicle Market would witness market growth of 25.4% CAGR during the forecast period (2019–2025).

Increasing investment in the development of electric vehicles, the development of charging infrastructure, operations to raise awareness of the benefits associated with electric commercial vehicles (for example, reducing extra user costs), and growing ECV revenues are expected to drive the growth of the global market in this region.

The market is witnessing a steady growth pace in this region due to extensive participation of developed and developing economies. Furthermore, the governments across the region are making new initiatives to enhance their country's ability to deliver new and advanced products in the overall market.
