Abstracts

The Asia Pacific Inflation Devices Market would witness market growth of 5.2% CAGR during the forecast period (2019-2025).

Interventional cardiology has evolved to connect many specialties traditionally considered to be somewhat separate from each other. For example, endovascular technologies mastered in a conscious patient's small-caliber and bifurcating coronary artery vessels are applicable in larger vessels inside immobile organs, particularly when sedation or anaesthesia is performed. It is an example of how interventional cardiologists work in a number of vascular areas, including carotid circulation, upper and lower extremities, and the aorta and branches of it.

Physicians use medical imaging in interventional radiology (also called IR) to direct minimally invasive surgical procedures that diagnose, treat, and cure many forms of conditions. Modalities used for imaging include fluoroscopy, MRI, CT, and ultrasound. Interventional radiology makes use of novel technologies like inflation devices to effectively carry out minimally-invasive diagnostic and treatment procedures.

Interventional radiology is sometimes used to insert catheters of the central venous and subcutaneous channels, with some evidence of gain over surgical placement. Arterial embolization procedures are used to treat certain cases of hemorrhage and serious postpartum hemorrhage is highly successful. Vascular procedures such as endovascular varicosity diagnosis, acute limb ischemia, and pulmonary embolism are preferable to surgical techniques. Furthermore, inflation devices are gaining widespread adoption in this field.

Based on Application, the market is segmented into Interventional Cardiology & Radiology, Urological Procedures, Peripheral Vascular Procedures and Gastroenterological Procedures. Based on Display Type, the market is segmented into Analogue Inflation Devices and Digital Inflation Devices. Based on End User, the market is segmented into Hospitals & Clinics and Ambulatory Surgical Centers. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
