The Asia Pacific Infusion Pumps & Accessories Market would witness market growth of 6.6% CAGR during the forecast period (2018 – 2024).

Infusion pumps and accessories are a set of drugs delivering devices which are used to administer medications in a controlled, precise and automated manner. These devices are for therapeutic purposes, and come handy in critical care, pain management and other applications, to administer medications on a continuous basis to ensure patients comfort and also offer pain-free therapy. Swelling demand for home-based healthcare solutions, rise in geriatric population, and increasing levels of disposable income in the developing economies would supplement the market growth.
