Abstracts

The Asia Pacific Log Management Market would witness market growth of 13.1% CAGR during the forecast period (2019-2025).

The Asia Pacific (APAC) region is composed of growing economies including China, India, Australia and Japan, which are expected to experience high growth rates in the Log Management Market. Due to the rapid growth of the IT infrastructure in this area, there is a growing need to protect the numerous endpoints and applications running within these IT infrastructures. This led to a demand for log management solutions that reduce evolving threats by blocking unauthorized applications from execution on endpoints and reducing risks. Some of the significant drivers for the APAC Log Management Market include increased rate of security breaches as well as strict government regulations and standards for data security and cyber security.

The log management system may be a hidden, highly specialized business intelligence system. However, like its market-focused counterpart, it brings the table with game-changing benefits. For example, day-to-day transactional data can at last be presented as a whole throughout the enterprise rather than in isolated and disjointed silos. The

continuous control of all devices is a bit like being everywhere at once. As godly as it may sound, the fact is that this new set of virtual eyes increases the productivity without having to increase the headcount. Accelerated visibility in corporate events is also associated with increased awareness of real-time activity, which eventually enhances overall security posture by enabling workers to react quickly to disruptive incidents.

Based on Component, the market is segmented into Solution and Services. Based on Deployment Type, the market is segmented into On-premise and Cloud. Based on Organization Size, the market is segmented into Large Enterprises and Small & Medium Enterprises. Based on End User, the market is segmented into IT, ITES & Telecom, BFSI, Healthcare & Life Sciences, Retail & eCommerce, Education and Others. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
