Abstracts

The Asia Pacific Multi-Layer Ceramic Capacitor (MLCC) Market would witness market growth of 6.1% CAGR during the forecast period (2019-2025).

Asia Pacific is expected to emerge as the fastest-growing region over the forecast period due to excessive demand from end-use sectors with an increase in MLCC capacity rates and capacitor miniaturization. MLCCs used in a wide range of capacitance. They are used extensively in several end-use industries like automotive and electronics. Due to features like better resistant voltage, greater efficiency and higher frequency, these capacitors are chosen over other capacitors. In addition, MLCCs are commonly used in apps such as tuner and cell phones in radio frequency (RF).

In perspective of accommodating common trends in the electronics industry, such as miniaturization, multi-functional applications, and convergence with high-frequency applications, MLCC designers focus on capacity development of advanced MLCC varieties. In order to satisfy the processing demands, several Chinese capacitor companies invest in equipment upgrades.
