Abstracts

The Asia Pacific Neonatal Critical Care Equipment Market would witness market growth of 13.7% CAGR during the forecast period (2020-2026).

Neonatal hypothermia occurs when the body temperature of the newborn is below 36.5°C (97.7°F). Every 1°C drop in body temperature is correlated with a major rise in neonatal mortality. Loss of body heat may occur due to cold environments or failure to dry and wrap the infant immediately after birth. Because pre-and low-birth-weight infants have smaller amounts of fat that help to generate heat, they are at higher risk of hypothermia.

The rising incidence of neonatal jaundice, an increasing number of preterm births, and the introduction of new products for use in Neonatal Intensive Care Units (NICUs) are anticipated to drive the market for neonatal critical care equipment. The market for neonatal critical care equipment is characterized by a high prevalence of neonatal jaundice worldwide.

Advanced technology and skilled health professionals help to pay more attention to newborn babies who are admitted to the hospital/clinic special division. Neonatal babies admitted to this special division (NICU) are premature; these premature babies are of low weight or require more medical attention. NICU is often used in children with chronic issues such as allergies, respiratory disorders, or birth defects.

Thermoregulation technologies are an important complement to kangaroo maternal care by improving the health outcomes of preterm and sick neonates. Although incubators have the most advanced warming technology, they are also prohibitively expensive and do not require convenient access to the infant. In addition, there may be a risk of

infection when an incubator is used. Not only must the unit be thoroughly cleaned and disinfected at regular intervals, but water in the reservoir must also be changed frequently to prevent the growth of microorganisms.

Based on Type, the market is segmented into Respiratory Equipment, Thermoregulation Equipment, Monitoring Equipment, Phototherapy Equipment, and Others. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
