Abstracts

The Asia Pacific Nephrostomy Devices Market would witness market growth of 9.3% CAGR during the forecast period (2019-2025). Asia Pacific is projected to grow at the highest possible growth between 2019 and 2025 due to increasing cases of kidney disorders, positive government initiatives, and various NGO programs to raise product awareness. Also, the presence of a large number of key businesses in China and India contributes to the expansion of the market. It is further expected that the fast-growing medical tourism market in Asia Pacific's emerging economies will boost product demand, thereby increasing the market growth.

Nephrostomy catheters are widely used in cases of blocked urine collecting system, to drain the kidney. This blockage leads to hydronephrosis, which is operated with the assistance of nephrostomy catheters. Henceforward, escalation in the number of hydronephroses is projected to induce the demand for catheters, thus stimulating the nephrostomy devices market growth. The cases of bladder, prostate, and ovarian cancers have risen significantly, which is expected to positively impact the market demand over the years to come. Additionally, the widespread cases of post-operative infections in patients with a kidney transplant are another crucial factor.

Based on Product, the market is segmented into Guidewires, Sheath Dilators, Nephrostomy Catheters, Drainage Tubes and Other Nephrostomy Devices.
