Network security is a wide concept covering a variety of technologies, devices, and procedures. It is, in its simplest term, a set of laws and settings intended to safeguard the integrity, confidentiality, and availability of computer networks and information using both hardware and software technologies. Every organization, irrespective of size, sector or infrastructure, needs network security solutions in place to shield it from the ever-growing environment of cyber threats today.

The APAC market will rise over the forecast period of 2019 and 2025, at the highest CAGR.
