The Asia Pacific Network Traffic Analyzer Market would witness market growth of 17% CAGR during the forecast period (2017 – 2023). Network traffic analyzer uses manual and automated techniques while reviewing granular-level data within network traffic. The process is used to gain in-depth insight into the kind of traffic/network packets or data which is flowing through a network. Network monitoring or network bandwidth monitoring software/application is used in the process of conducting traffic analysis. The growth in the Asia Pacific region can be attributed to the factors such as rapid adoption of network traffic analyzer solutions by enterprise customers in fast growing countries such as China, India, and Australia. Also, growing incidences of security attacks namely malwares, viruses, and Denial of Service (DoS) over enterprise networks would add to the adoption of the technology in the region.
