Abstracts

The Asia Pacific Operating Room Integration Market would witness market growth of 12.2% CAGR during the forecast period (2020-2026).

Operating rooms are getting more complex and congested with the addition of a variety of equipment, such as surgical lights, operation tables, and surgical displays. In basic ORs, individual devices are pulled back or moved back according to their application. Cords and cables are scattered throughout the room, increasing the risk of tripping or pulling out the critical chord during surgery or harm to any equipment. Integrated operating rooms (I-ORs) help to solve this issue. The high demand for MIS has stimulated the integration of the operating room due to its related advantages, such as safety.

The increasing number of orthopaedic procedures requires the integration of the patient rooms in order to reduce the burden on surgeons and manage the surgical workflow effectively. Moreover, the rising demand for advanced healthcare services, the high rate of incorporation of the operations rooms attributable to the growing pool of patients with chronic diseases, is further stimulating the growth of the market for the integration of the patient rooms.

Throughout the Asia Pacific, the integration demand for operating rooms is expected to

grow rapidly over the forecast period. Growth is driven by the growing pool of patients suffering from chronic disorders requiring surgery and a rising need for sophisticated medical devices in hospitals. In addition, the growing number of MIS procedures and the rapid expansion of healthcare facilities in this region are driving the development of the market for the introduction of operating rooms in the region.

Based on Component, the market is segmented into Software and Services. Based on Application, the market is segmented into General Surgery, Orthopedic Surgery, Neurosurgery and Other Application. Based on End Use, the market is segmented into Ambulatory Surgical Centers (ASCs) and Hospitals. Based on Devices, the market is segmented into Display Systems, Documentation Management Systems, and Audio Video Management Systems. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.

The market research report covers the analysis of key stake holders of the market. Key companies profiled in the report include of Stryker Corporation, Drägerwerk AG & Co. KGaA, Steris PLC, Olympus Corporation, Canon, Inc., Barco NV, Getinge AB, Brainlab AG, Skytron, LLC, and Karl Storz SE & Co. KG
