Orthoses devices are generally made of plastic or graphite, due to flexibility offered by these materials, and at the same time restricting abnormal movements. Neoprene is also popular in soft braces as it provides comfort and is also has easy applications. Technological advances such as computer-assisted design (CAD) and 3D printing have contributed to the growth of personalized orthoses. Customized devices have the potential to deliver better results, as compared to pre-fabricated devices. Growing trend of physical fitness in baby boomers has led to more number of hospital visits for muscle pain and other skeletal muscular problems.
