Abstracts

The Asia Pacific Patient Portal Market would witness market growth of 19% CAGR during the forecast period (2019-2025).
It is possible to increase the use of patient portals by making the patient a part of the health care community. This can be achieved by providing receptionist access to the patient portal at the time of check-in, nurse or medical assistant taking vitals, and to a physician during the examination. The patient can also be empowered by teaching them how to use the patient portals and the various advantages of using them, which will often encourage the patient to visit the patient portals.
Traditionally, patient communication programs were centered on face-to-face visits to the hospital. With only a small percentage of patients currently using patient apps, digital patient engagement was slow to take off. Improving patient satisfaction would require healthcare organizations, throughout the treatment continuum, to use more advanced engagement methods. Furthermore, to enable a broader engagement model, software providers will need to "tool up" the patient portal.
Based on Type, the market is segmented into Integrated and Standalone. Based on End Use, the market is segmented into Providers, Payers and Others. Based on Mode of Delivery, the market is segmented into Cloud-based and Web-based. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
