## Abstracts

The Asia Pacific Pest Control Market would witness market growth of 6.5% CAGR during the forecast period (2019-2025).

The Asia Pacific is one of the fastest-growing pest control regions. The elevated concentration of urban population and urbanization in the region presents a strong opportunity for suppliers of pest control facilities. The consequences of climate change and, in some instances, negligence towards sanitary circumstances in urban slums has led in numerous epidemics. Advancements in legislation and policies on pest control requirements have benefited pest control service providers in the Asia Pacific region. In addition, the region has also been prone to many outbreaks of pest-borne disease over the past two decades. There have been a substantial amount of Zika virus-related instances in the region. Zika virus is a mosquito-transmitted Flavivirus and has been identified in several nations in the Asia Pacific area, including Thailand, Malaysia, the Philippines, Vietnam, and Indonesia.
