Abstracts

The Asia Pacific Prosthetics and Orthotics Market would witness market growth of 6% CAGR during the forecast period (2019-2025).

Patient outcomes are improved when the goals of patient activity match those of the component built for that activity. Careful assessment of components, such as overall weight, control options and compatibility with other components, is important for the development of functional prosthesis. Insurance can determine which parts a patient can order; the prescribing physician must be aware of the cost of such parts.

Prosthetic elements of the upper extremity evolve gradually. The number and type of components needed for prosthesis depend on the activities, goals and amputation level of the individual. For a patient with an upper extremity amputation, administering the correct components may indicate the difference between a patient achieving their objectives and a patient who has a prosthesis that merely operates with prehension. A deep understanding of prosthetic componentry helps the physician to make informed decisions for patients of prosthetic treatment.

In the future, the orthotist/prosthetist's clinical position will continue to develop with the implementation of new, contemporary care models that concentrate on assisting clients in defining their treatment goals and assessing how effectively those goals have been

achieved. Practitioners are required to use high-level communication skills to promote conversations, thereby assisting clients in defining their own treatment goals and informing their decision about orthotic/prosthetic treatments despite an understanding of the likely outcomes.

Based on Type, the market is segmented into Orthotics and Prosthetics. Based on Orthotics Category, the market is segmented into Upper limb, Lower limb and Spinal. Based on Prosthetics Category, the market is segmented into Upper extremity, Lower extremity, Liners, Sockets and Modular components. Based on countries, the market is segmented into China, Japan, India, South Korea, Singapore, Malaysia, and Rest of Asia Pacific.
