Abstracts

The Asia Pacific Secure Web Gateway Market would witness market growth of 18.9% CAGR during the forecast period (2019-2025).

Networks are being rapidly decentralized with the fast proliferation of the Internet and the rise in the digital era. Furthermore, critical resources and data are also being moved to the cloud and the Network's risks are growing. These aspects ensure safe approaches to defend consumers, networks and data accessible from various platforms and sites across the web. Presently, SaaS applications are becoming popular in organizations of all sizes and industries and security regulation is consequently moving to cloud. In addition to defending users from threats online, this has led to major developments in secure web gateway solutions for web traffic control and bandwidth management.

The industry is growing exponentially with high dependence on internet, increasing demand from companies to prevent and defend end-customer data from ransomware attacks and breaches of information. Furthermore, productivity monitoring is also driving the industry at a rapid growth rate. Indigenous and persistent attacks have been a major concern for industries like BFSI, healthcare and government departments, raising the need for an appropriate and integrated security solution. This provision is expected to
