Abstracts

The Asia Pacific Serverless Architecture Market would witness market growth of 24.9% CAGR during the forecast period (2018 – 2024). Serverless architecture is a software design pattern in which applications are provided by a third-party service, thereby, eradicating the necessity for hardware management and server software by the developer. The conventional IT infrastructure in manufacturing, BFSI, and retail industries have gradually shifted toward automation. Along with application of up-to-date cloud-based technologies, serverless architecture is likely to exhibit substantial growth during the forecast period. Furthermore, the growing number of investments in digital transformation to diminish operation expenses might stand as a latent factor driving the APAC market.

Based on Deployment Type, the market is segmented into Public Cloud, Private Cloud and Hybrid Cloud. Based on service Type, the market is segmented into Automation & Integration Services, Monitoring Services, Security, API Management Services, Support & Maintenance, Training & Consulting and Others.
