## **Abstracts**

The Asia Pacific Sleep Apnea Devices Market would witness market growth of 8.7% CAGR during the forecast period (2019-2025).

Keeping an awareness of the adverse effects of untreated sleep apnea, increased use of oral devices and the technical development of sleep apnea machines, significant venture capital funds and a rising number of firms engaged in sleep apnea and oral application are primarily important drivers of the growth market for sleep apnea devices. The incidence of sleeping apnea rises as other diseases such as hypertension, heart diseases, diabetes and mental disorders such as depression and anxiety become more severe. Increasing awareness about the long-term effects of sleep apnea is expected to drive revenue growth in the forecast period.

The diagnosis rate of OSA in countries with large population bases, such as India and China, is

Low understanding of sleep disorders in low-and middle-income countries, however, and strict enforcement requirements set by third-party payers leading to restricted reimbursement, are hindering market growth. Furthermore, in developing and

underdeveloped countries, the discomfort caused to the user by sleeping apnea devices while sleeping and the high cost of these devices often restrict their adoption.
