Abstracts

The Asia Pacific Smart Dishwasher Market would witness market growth of 15.9% CAGR during the forecast period (2020-2026).

Smart dishwashers are now compliant with voice control systems like Google Home and Amazon Alexa, making it easier to run. The dishwasher industry players have also implemented sensing technology that they are now using in their products to automatically detect the size of the load and the amount of grime on the dishes. The dishwasher then prepares for small amounts of energy and water consumption. Those with built-in detergent dispensers that warn the consumer when the detergent is running low or automatically orders to be refilled from the preferred supplier.

While players in this area continue to adopt emerging technology for the design of personalized goods for different markets, reports also suggest that online vendors will play a key role in driving the market growth. In general, online shopping is projected to drive much of the growth in the overall retail sector over the next few years. This is attributable to the growing acceptance of electronic payments and the penetration of the Internet in emerging markets. The smartphone has made it easier for people to shop online because it offers convenient access to the internet. Social networking outlets have also played a role in promoting the development of online retail.

Over the years, the smart dishwasher industry has seen tremendous progress with new product developments in technology, functionality, efficiency, and design. For starters, Xiaomi Corporation has released a new Viomi Smart Dishwasher 2019 model capable

of delivering 15000pa ultra-high pulse pressure flushing water flow and using three-dimensional spray technology.
