The Asia Pacific Specialty Lighting Market would witness market growth of 10.7% CAGR during the forecast period (2020-2026).

With a growing awareness of 'smart everything,' the concept of smart cities has also attracted increasing attention, which is largely the end result of all intermediary technologies. India is seeing considerable growth in the field of LED lighting, and will be one of the LED growth-driving key regions in the years to come. The drivers of this exponential development include many, including special light energy efficiency, their longevity, and consumer thinking and, most of all, government encouragement. The Government has issued a series of policies from all perspectives to support the development of the industry, the most crucial of which are the Street Light National Program (SLNP) and the Domestic Efficient Lighting Program (DELP). The objective is to minimize the share of national energy use for lighting from 18% to 13% by 2020.
