### Abstracts

The Asia Pacific Spirulina Market would witness market growth of 12% CAGR during the forecast period (2019–2025).

Spirulina is rich in chlorophyll, phycocyanin, and beta-carotene and is often used as a source of natural color. Edible color Linablue, used in ice creams and confectionaries, is mainly produced from spirulina. Factors such as the introduction of new varieties of natural food colors produced from spirulina, natural health benefits of spirulina superfood, and several government initiatives for facilitating the production of spirulina, are expected to boost the growth of the global spirulina market over the forecast period. The governments of various countries have started promoting the production of spirulina to strengthen the market and create a decent income source for the rural population. The governments of many countries such as India, are actively supporting the local spirulina market and building a strong gateway for the development of this superfood which can change the course of food for the entire race.
